

Disability Awareness

Presenter: Manju Banerjee

Bergen Community College

Universal Design for Instruction (UDI) is "a framework for designing curricula that enable all individuals to gain knowledge, skills, and enthusiasm for learning." Represented in most college classes are students with a diversity of ages and learning styles, including visual and auditory, different ethnic backgrounds as well as an increasing number of students with disabilities. Learning how to create a learning environment that is accessible and usable for everyone is the goal of this workshop. Dr. Manju Banerjee is Associate Director of the Center for Students with Disabilities at the University of Connecticut. She is Associate Research Scholar at the Center for Postsecondary Education and Disability and a faculty member at University of Connecticut's Center for Continuing Studies.
